

Foundation for Male Engagement Uganda Commitment

Narrative:

In Uganda, We have no Family Planning Male Engagement Strategy By 2025, We expect to have government support through the Ministry of health and Development partners like UNFPA to facilitate the development and implementation of the Family planning Male Engagement Strategy. Foundation for Male Engagement Uganda through its Advocacy networks commits to work with Government and other stakeholders through a Multi-sectoral Approach in order to have the strategy developed and also come up training manuals for its implementation among partners.

Outcomes:

Family planning Male Engagement Strategy Developed. Increased male involvement to support women and girls to reduce the unmet need for Family planning to 10% By 2030, We anticipate men to commit to use condoms and also embrace vasectomy as a family planning method
