

SERAC-Bangladesh Commitment

Narrative

Commitment 1

- By 2022, at least 2 volunteers (one male, one female) aged between 18-25 are trained and recruited with a monthly subsistence allowance to ensure meaningful participation of youth in providing friendly FP/SRHR services to adolescents and youth at the AFHCs in Bangladesh.

Commitment 2

- By 2025, at least 20 youth organizations that are actively working in FP/SRHR, included in the adolescent- friendly health corner's management committee to actively take part in the local level decision-making on their needs around Sexual Reproductive Health services, and support in designing program delivery mechanisms to address the demands of youth.

Commitment 3

- By 2022, advocacy initiated to introduce youth engagement strategy for services including but not limited to adolescent SRH services and counseling, antenatal care, pregnancy and delivery process, and immunization.

Commitment 4

- By 2025, young people aged between 15-30 living in 4 districts including Dhaka, Naraynaganj, Mymensingh and Netrokona will be able to access contraceptives and FP/SRH commodities through a digital delivery and unmet need tracking mechanism with a GPS facility that will include outreach and wider coverage beyond the physical SHR/FP facility in Bangladesh.

Commitment 5

- By 2030, advocacy initiated to ensure adolescents and youth unmet needs-focused FP promotional and outreach programs to cover urban and rural youths with age/geography-specific actions both online and offline.

Commitment 6

- By 2030, advocacy will be initiated to include married adolescents and youth directly in the SRH/FP service delivery monitoring process in both government and non-government facilities and programs.

Commitment 7

- By 2030, SERAC will advocate to ensure that the government takes effective and inclusive measures including the eradication of taboos related to FP/SRHR to ensure equal access to RH commodities, and services for all youth including the transgender population, and physically challenged persons.

Commitment 8

- By 2030, SERAC will work with the DGFP and the stakeholders to ensure FP/SRHR information services for integrating into the community clinics at the ward level across the country.

Outcomes & Values

- By 2025, at least 5000 adolescents and youth representatives directly received essential knowledge and information around FP and SRHR to support inclusive implementation of the national adolescent health strategy.
- By 2025, at least 20 youth organizations and networks engaged in capacity building programs to work and able to spread more information among their networks aligned with the goals of Universal health coverage
- By 2030, SERAC achieves a stronger negotiation position with the Director General of Family Planning to integrate the adolescent SRH data in their MIS (Management Information System), with a proper monitoring process to have the accessibility of adolescent data.
- By 2025, evidence-based research reports on accessibility of youth-friendly quality SRH services will be published, accessible, affordable, and acceptable for the adolescents and young people in 4 districts of Dhaka, Narayanganj, Mymensingh and Netrokona.
