

# Nepal's

# FP2030 Commitment

## NEPAL'S FAMILY PLANNING VISION FOR 2030:

Every individual and family will lead a healthy, happy and prosperous life, fully exercising their sexual and reproductive health and rights

### 1. Strengthen health governance for the family planning program in the federalized context

Nepal will strengthen coordination mechanisms among all three tiers of government, sensitize and build capacity of provincial and local policymakers and program managers, conduct social audits at local and health facility levels, regularize local review and planning meetings, strengthen intersectoral communication and collaboration mechanisms and ensure that the Minimum Initial Service Package (MISP) is integrated into Disaster Risk Reduction Plans at all levels.

### 3. Ensure Sexual and Reproductive Health services are responsive to the need of adolescents and youth

Nepal will focus on advocating for enabling environments and the incorporation of adolescents into policies and guidelines. Furthermore, the government, grounded in ensuring meaningful and inclusive adolescent and youth participation, will expand quality services for adolescents and youth, engage private sectors, train service providers, and coordinate with at all levels to implement comprehensive sexuality education.

### 2. Improve equitable access to a range of contraceptives to meet the contraceptive need of individuals and couples

The government will advocate at all levels to prioritize FP and ensure access to quality FP services within a Human-Rights-Based Approach, update existing policies, and implement new ones to ensure that FP programs reach marginalized, underserved, and geographically isolated populations. Improved and expanded national policies and guidelines will expand contraceptive choices, improve capacity and quality of SRH and FP training sites, and enhance integration of FP with other health services.

### 4. Ensure round-the-year availability of family planning commodities in all service delivery points

To decrease the number of stock-outs to less than 5% in 2030 (from 25.33% in 2019), the government will increase logistics management systems surveillance of FP commodities, including strengthening capacity in use of these systems and expanding their implementation around the country. The government will also develop a Sustainability plan for FP commodities and increase allocation for the timely purchase of FP commodities under the national budget.

### 5. Implement tailored demand generation and strategic behavioral change interventions

Nepal will integrate social and behavior change (SBC)/Demand Generation at all levels. Focuses include: increasing capacity of FP providers; creating an FP communications strategy; collaborating with organizations and academia across fields; developing and strengthening public-private partnerships; increasing male engagement in FP; and ensuring resource allocation for SBC/Demand Generation.

Knowledge SUCCESS is supported by USAID's Bureau for Global Health, Office of Population and Reproductive Health and led by the Johns Hopkins Center for Communication Programs (CCP) in partnership with Amref Health Africa, The Busara Center for Behavioral Economics (Busara), and FHI 360. The information provided in this infographic are the sole responsibility of Knowledge SUCCESS and does not necessarily reflect the views of USAID, the U.S. Government, or the Johns Hopkins University.

## FINANCIAL OBJECTIVE: ENSURE INCREMENTAL BUDGET ALLOCATION REQUIRED FOR FAMILY PLANNING TOWARDS ACCESS TO UNIVERSAL HEALTH COVERAGE

Nepal will increase the annual government allocation for FP each year as envisaged in the FP Sustainability Roadmap (2023-2030) by integrating the Family Planning Spending Assessment (FPSA), generating evidence on FP budgeting and financing gaps, ensuring efficient utilization (spending) of allocated resources in line with established frameworks, ensuring M&E of FP-related financing, engaging private service providers to diversify resources, developing a risk pooling strategy at the local level and advocating for a dedicated budget for FP service quality and for resources beyond the health sector.

## Approach to Accountability

Nepal will leverage existing committees, meetings, and feedback mechanisms to track commitments at all levels of government. To ensure inclusivity of all stakeholders, Nepal will increase the existing multi-sectoral representation at all platforms. Progress will be shared with stakeholders and the public through different channels including annual reports, FP2030 monitoring reports, social media, national government websites, press meetings, and national level other conferences and workshops.

The FP2030 commitment was created in alignment with other national commitments such as the SDG, ICPD+25, and CEDAW among others. Monitoring mechanisms through these other commitments will also be leveraged to ensure continued alignment of the FP2030 commitment.

## COMMITMENT PRINCIPLES:

### FP2030 Commitments should...

- Align with the country's other partnerships
- Be grounded in available data and evidence
- Address FP2030's 5 focus areas
  - policy
  - data
  - financing
  - gender norms
  - system responsiveness
- Be developed and validated through an inclusive, equitable, and transparent process
