Updated framework monitoring individual, system and environment levels

Knowledge dissemination

Knowledge sharing through interconnected regional hubs

Promoting high-impact, rights and evidence-based practices

Global, regional and country-level advocacy and accountability

## Building FP2030: What's Changing?

Our new partnership is the result of almost two years of careful work, planning, and consultation with stakeholders all over the world. **We're keeping the best of FP2020 — the convening power of the partnership, the collaborative platforms, the dedication to high-quality data and evidence,** the unswerving commitment to the **rights and needs of women and girls** — while embracing changes that **emphasize country leadership, inclusion, equity, transparency, and mutual accountability.**
